Projects:

Melody Mapper | Deployed | GitHub Repo

- Implemented the 'Add to Favorites' functionality using JavaScript. Users can seamlessly add events to their favorites, which are stored in the local storage. Each favorited event is represented as a button in the 'Favorites' section, allowing users to revisit saved events even after the page refreshes by clicking on a favorited event button it navigates the user directly to the corresponding event.

Cultured Cuisine | Deployed | GitHub Repo

To Be Frank | Deployed | GitHub Repo

- Contributed significantly to the front-end development, using Handlebars for 'Cultured Cuisine,' and React for 'To Be Frank' alongside CSS and media queries to enhance the user interface.

- Applied responsive design principles, ensuring optimal display across various devices and screen sizes for both projects.

- Leveraged Handlebars in 'Cultured Cuisine' and React in 'To Be Frank' to streamline dynamic content rendering, resulting in aesthetically pleasing and user-friendly interfaces.

- Collaborated closely with the development teams for both projects, implementing and refining visual elements that contributed to polished and responsive web applications.
